CAPABILITY STATEMENT

Jeremy Kane

Independent software developer: custom software, modernization and long-term maintenance of backend services and APIs, cloud and web applications, and installed apps. Small business, sole proprietor, Glen Allen, Virginia.

info@kanetik.com **804-304-4240** **kanetik.com**

Core competencies

- Custom software development in C#/.NET, Java and Kotlin
- Repair, modernization and extension of existing and legacy applications
- Backend services, APIs and web applications: ASP.NET Core, Azure Functions, React
- Database design and development: SQL Server, Cosmos DB
- Native Android applications, from first release through long-term maintenance
- Cloud deployment and infrastructure as code on Microsoft Azure
- Requirements analysis, technical documentation and code review

Differentiators

- More than 25 years writing production software, since 1999, across web, enterprise and mobile systems
- One senior developer accountable end to end, from requirements through delivery and support, with no hand-offs
- Proven long-term maintenance: an Android app with 500,000+ downloads, maintained since 2015
- Hands-on modernization: as a lead engineer, replaced a legacy enterprise data service with zero downtime
- Government contract experience as a contractor employee: Air National Guard, DoD, NOAA and the City of Richmond
- Accessible by default: every page of this site scores 100 in automated WCAG audits
- Auditable delivery: every change built in isolation, delivered as a reviewed pull request, with a complete history of what changed and why

Past performance and experience

Government contracts, as an employee · 1999–2005
Technology TEAM, Inc., a federal contractor in Alexandria, VA (1999–2000, 2001–2005): web and database programmer on contracts for the Air National Guard, the Department of Defense and NOAA. Halifax Corporation, Richmond, VA (2000–2001): the City of Richmond's government website. ASP.NET, classic ASP, ColdFusion, SQL Server.

Wakey, Android app · 2015–present
Acquired in 2015, then redesigned and rebuilt; sole designer and developer since. 500,000+ downloads on Google Play. Kotlin, Jetpack Compose, Firebase.

Kids Eat Cheap Tonight, web application · 2026
Nationwide restaurant-deal search. C#/.NET 10 API on Azure Functions, Cosmos DB, Astro and React, Bicep infrastructure.

Pricing Fair, web application · 2023–present
Global price-parity calculator. ASP.NET Core API and React front end on Azure.

Independent client work · 2001–2014
Web applications, including client administration and payment-processing sites, for Healthcare Management Group, Origin Healthcare Solutions, Multi-Threaded, LakeStar Lodge, James River Insurance, Point Blank Imaging, Rockbridge, East Hampton Airlines, the Virginia Tech Alumni Association and Medical Home Plus. ASP.NET, C#, VB.NET, SQL Server.
